

Week06 – Error-correcting codes

George McNinch

2024-02-21

- [\[Problem set 4\]](#) due 2024-03-01
- [\[Notes 2024-02-21\]](#) Includes material on check matrices, on finite projective spaces and Hamming codes, and on finite fields.
- [\[Notes 2024-02-22\]](#) Includes material on Shannon's Theorem, and on block codes.

(Actually, I've put all of the "finite field" material in the first set of notes, even though some of the material appeared in the second lecture. Seemed cleaner that way ...)
